### [57] ABSTRACT

A truck bed divider having a unitary, one-piece structure which may be easily positioned in and instantly removed from a truck bed includes a dividing portion having a plurality of bars for preventing articles in the truck bed from moving or sliding in the truck bed. The divider further includes top and bottom frame portions which are joined to the divider portion and which support the divider portion in the truck bed. Retaining or bracing portions brace the truck bed divider against the truck bed.
